

## **How To Clean Your Acrylic Sign**

Acrylic signs are fairly easy to clean, but there are a few things to keep in mind to ensure the best results. The most important thing to remember about cleaning acrylic signs is that you should never use any kind of cleaning agent that contains ammonia, alcohol or harsh chemicals. Never use glass cleaners or common kitchen grease cleaners on your acrylic signs.

The next thing to remember is to avoid the use of any kind of rough scouring material. Rough scouring pads or cloths can cause the dirt you are wiping off to also be ground into the acrylic, causing tiny scratches.

Finally, never wipe your acrylic logos with a dry cloth, as this can also grind the dirt into the acrylic in much the same way as scouring materials will do.

### **Acrylic Sign with Applied Graphics**

**Do Not** polish or buff graphics that have been applied to acrylic.

### **Washing The Acrylic Sign**

The best way to clean acrylic logo signs is with clean, lukewarm water and a clean, soft, nonabrasive, non-linting cloth. Mild soap or detergent can be mixed with the lukewarm water when necessary.

### **Drying The Acrylic Sign**

For a streak-free sign, dry with a clean, dry soft cloth. Gently blotting the sign with the cloth is the safest way to ensure a beautiful result. For signs that cannot be easily reached, you can simply allow the sign to air dry.
